VOLUME 3. NO. 44

WEST LIBERTY, MORGAN COUNTY, KENTUCKY, THURSDAY, APRIL 10, 1913.

WHOLE NUMBER 148

HOME COURSE IN SCIENTIFIC AGRICULTURE

SECOND ARTICLE — THE LIMING OF SOILS.

By H. J. WHEELER, Ph. D., Director and
Chemist of the Rhode Island Agricul-
tural Experiment Station.

THE recognition of the agricul-
tural value of certain forms of
lime is not new, and it appears
from the writings of Pliny
that liming was practiced by the Ro-
mans more than 2,000 years ago. In
England, Germany, France and other
European countries the application of
lime in various forms has been and is
still practiced extensively, but as the
United States, probably 90 per cent of the
arable soil of the United States has
never been limed, and indeed many
large areas are not in need of it.

Authorities seem to agree that lime
is necessary to the plant, and if it is
wholly lacking in soils, even though an

Photograph by United States department
of agriculture.

DISEASED CARROT PLANT — MUCH LESS
APT TO OCCUR IN FIELDS TREATED WITH
LIME.

abundance of all the other essential
elements is present, the plant cannot
develop normally. The plant cannot
grow 1/2 any one of the essential el-
ements of plant food is lacking. Fortu-
nately, however, many soils are well
provided with lime by nature, and it is
seldom or never necessary for those
who cultivate them to resort to liming.

The method usually resorted to for
ascertaining the amount of lime in
soils is to treat them with some strong
mineral acid (usually hydrochloric) and
determine the amount of lime which
is thus dissolved. Some writers state
that if only one-half of 1 per cent is
thus shown to be present immediate re-
sort to liming is desirable; others set
the amount higher, and some seem to
prefer to have present as much as 1
per cent.

The fact that beet of all kinds make
a ready response to liming on soils
which are deficient in carbonate of
lime may be utilized as the basis for a
practical and reliable method of test-
ing the lime requirements of the soil.
For this purpose lay out two plots of
land, each about 12 by 24 feet, measure
each of the plots with like amounts of
fertilizer containing potash, phos-
phoric acid and nitrogen and apply
lime to one of the plots at the rate of
from one to two and a half tons per
acre (forty pounds per plot would be
approximately two and a half tons per
acre). A comparison of the growth and
yields on the two plots will fur-
nish a safe means of judging whether
the soil will respond profitably to ap-
plication of lime.

Liming Sometimes Injurious.

Excessive amounts of lime, especial-
ly on light soils, may have an injurious
action. This is particularly true of
freshly slaked lime and of ground
limestone upon light sandy soils, which
are inclined to be dry and which con-
tain only small amounts of organic
matter. It hastens unduly the decom-
position of organic matter and thus
renders the soil more open and less re-
tentive of fertilizers and moisture than
before. If either ground burned lime
or slaked lime must be used upon such
soils it should be applied in small
amounts at not too frequent intervals.

The arguments in favor of the use
of lime are summarized thus:
The use of lime as a soil improver is
very ancient, and its value for this
purpose is generally recognized. Its
action as a fertilizer is both direct and
indirect.

There are many soils in which lime
is deficient, notably such as are deriv-
ed from granite, mica schist and cor-
dillite. In these soils, and in others
where lime is often of direct value
as a necessary element of

locking the unavailable potash, phos-
phoric acid and nitrogen in the soil.

Lime exerts a decided influence on
the mechanical condition of soils, ren-
dering heavy compact soils looser in
texture and tending to bind particles
of loose, leachy soils.

Lime is also beneficial in furnishing
conditions in the soil favorable to the
activity of the micro-organisms which
convert the nitrogen of organic matter
into nitrates which are readily assimi-
lated by plants which decompose or-
ganic matter and which assist certain
leguminous plants to assimilate the
free nitrogen of the air.

One form of lime (gypsum) has been
shown to be a most effective correc-
tive of black alkali.

The continued use of lime unaccom-
panied by other fertilizers may prove
injurious, especially on poor soils,
since it converts the insoluble nitro-
gen, potash and phosphoric acid com-
pounds of the soil into such as can be
rapidly taken up by plants or washed
out in the drainage, thus hastening the
exhaustion of the supply of these sub-
stances in the soil. As the German
science states, "The use of lime without
manure makes both farm and farmer
poor."

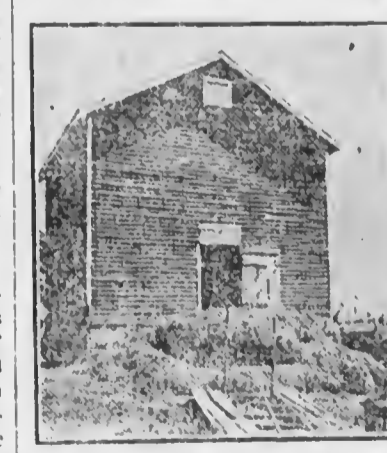

Behavior Toward Lime.

It has been shown that even upon
heavy upland and naturally well drain-
ed soils, apparently in good condition
otherwise, the sourness (acidity) is so
great that most varieties of plants will
not thrive. Lime is the most economi-
cal and effective substance thus far
used for correcting this condition. Ac-
cording to experiments made by the
Rhode Island agricultural experiment
station on acid soils in that state, the
plants tested may be classified with
regard to their behavior toward lime
as follows: Plants benefited by liming,
spinach, lettuce (all kinds), beets
(all kinds), okra (gumbo), salsify (veg-
etable oyster), celery, onion, parsnip,
cauliflower, cucumber, eggplant, can-
taloop, asparagus, kohlrabi, cabbage,
dandelion, Swedish turnip, pepper,
peanut, English or flat turnip, upland
cress (peppercress), mangel-wurzel, rhu-
barb, common pea, pumpkin, summer
squash (scalloped), golden wax bean,
red Valentine bean, horticultural pole
bean, bush lima bean, lentil, Hubbard
squash, scallion, bean, tobacco, sor-
ghum, alfalfa, clover (red, white, crim-
son and alsike), barley, emmer, wheat,
oats, timothy, Kentucky blue grass,
Canada pea, Catfish raspberry, goose-
berry, currant (White Dutch), orange,
quince, cherry and Burbank Japan
plum; plants but little benefited by
liming, Indian corn, spurry (it has
been reported in England that spurry
is injured by liming, but such results
have not been obtained in Rhode Is-
land), rye, carrot, chlorey, Rhode Is-
land bent and cichory; plants slightly
injured by liming, cotton, tomato, cow-
pea (drummond), Concord grape,
peach, apple and pear; plants dis-
tinctly injured by liming, lupine, com-
mon sorrel (Rumex acetosella), radish,
velvet bean, castor bean, flax, black-
berry, black cap raspberry and cran-
berry.

Frequency of Liming.

The frequency with which liming
should be practiced depends, among
other things, upon the character of the
soil and the rate of application, the
number of years involved in the rota-
tion practiced, the plants grown and
their order of succession. As a gen-
eral rule, it may be stated that from
one-half to one and one-half tons of
lime per acre every five or six years is
sufficient. Applications of two or
three tons may, however, be advisable
in cases of very acid soils which are
to be seeded down and are to remain
in grass for several years. The prac-
tice of applying small amounts of lime
at somewhat frequent intervals is be-
ing generally accepted as preferable
to the use of large amounts at rare
intervals.

Lime combined as carbonate, as in
marl, wood ashes, etc., can usually be
applied with safety in the spring or at
any other season of the year, but an-
timony is always the safest time to ap-
ply caustic or slaked lime. It is gen-
erally considered best to apply the
lime to the soil immediately after
plowing and harrow it in thoroughly.
Lime which is already slaked may
be spread upon the soil directly
from wagons or carts or dumped
into heaps and then spread with a
shovel, although the most satisfactory
plan in such cases is to use a lime
spreader or ordinary grain drill with
a fertilizer attachment. Where a lime
spreader or similar implement is not
available the burnt lime may be placed
on the soil in piles of from forty
to fifty pounds each, covered with
moist earth and allowed to sink be-
fore being spread with a shovel.

Photograph by United States department
of agriculture.

WASTEFUL METHOD OF STORING MANURE.

It is generally considered best to apply the
lime to the soil immediately after
plowing and harrow it in thoroughly.
Lime which is already slaked may
be spread upon the soil directly
from wagons or carts or dumped
into heaps and then spread with a
shovel, although the most satisfactory
plan in such cases is to use a lime
spreader or ordinary grain drill with
a fertilizer attachment. Where a lime
spreader or similar implement is not
available the burnt lime may be placed
on the soil in piles of from forty
to fifty pounds each, covered with
moist earth and allowed to sink be-
fore being spread with a shovel.

In conclusion, it may be said, ascer-
tain first whether lime is needed. If
it is, apply it judiciously, and never
depend upon lime alone to maintain
the fertility of the soil, for all of the
ingredients which plants need must
be present in the soil to insure the
profitable production of crops.

SHOULD ASSIST NEWSPAPERS

Dr. Williams says Church hasn't
Done its Duty in Dissemina-
tion of Information

Dr. Talcott Williams, of the
Columbia School of Journalism,
lecturing at the Sunday Morning
Forum of the Park Avenue Meth-
odist church, New York, told his
hearers that the church ought to
be the powerhouse of the mind
to demand improvement in all
news publications, whether news-
papers or low priced magazines. He
declared there is steady im-
provement in such publications,
but intimated that not much
credit for it was due to Christian
people.

Dr. Williams discussed not the
newspaper, but the reading citi-
zen.

"People who read newspapers
make them what they are," de-
clared he. "The newspaper is a
social not a literary product, and
since it disappears after only a
few hours of life it has a time
limit. The newspaper is the con-
science of the people. When a
man buys a paper he helps to ed-
it, even if he disagrees with
what he finds in it.

"You Christian people have done
your full share in the making of
bad newspapers. You are doing
your best to support the worst in
journalism. Your protest to the
editor, if you make one, receives
instant attention and has its im-
mediate effect. But you make
few protests. One of the efforts
of the church ought to be to su-
perintend and, if need be, change
moral of the newspaper. The
demand for improvement of the
newspaper comes from all sides,
as much from without as within
the church. There is steady im-
provement, and it is more rapid
than heretofore." — Ex.

Some "Fly" Information.

Where is the fly born? In ma-
nure and filth.

Where does the fly live? In all
kinds of filth and he carries filth
on his feet and wings.

Where does the fly go when he
or she leaves the manure pile
or spittoon. He goes into the
kitchen, the dining room and the
store.

What does he do there?
He walks on the bread
fruit and vegetables; he wipes
his feet on the butter and he
bathes in the milk.

Does the fly visit patients sick
with consumption, typhoid fever,
and cholera infantum? He
does, and he may call on you next,
carrying the infection of these
diseases.

What diseases does the fly car-
ry? Typhoid fever, consumption,
diarrheal diseases, diphtheria,
scarlet fever, and, in fact any
communicable disease. — Blue
Grass Farmer.

"Please Stop My—"

"Times are hard, money is
scarce, business is dull, retrench-
ment is due to—please stop my—
"Whiskey?" "Oh, no; times are
not hard enough for that. But
there is something else that costs
me a large amount every year
which I wish to save. "Please
stop my," ribbons, jewelry, orna-
ments and tinkets? "No, not
these, but I must retrench some-
where. "Please stop my—" To-
bacco cigars, snuff? "Not these
at all, but I believe I can see a
way to effect quite a saving in an-
other direction. "Please stop my
—" Tea, coffee and unhealthy
luxuries? "No, no, not these.
Ah! I have it now. My paper costs
\$1.00 a year. Please stop my pa-
per. That will carry me through
the winter easily. I believe in re-
trenchment and economy, espe-
cially in brain." — Ex.

There's nothin' I hate more
than the man who loses after
making a half-hearted fight and
then whines about it. Don't
whine, but take an extra hitch
in your britches, roll up your
sleeves and get in the fight to
win. — Bill, in The Evidence.

SCHOOL NOTES

Breezy Items of Our School by
the Normal Instructor

The Normal Department has
already begun the Teacher's Re-
view work that is so necessary
for successful examination. We
have ordered special books for
this work, and much is expected
of our pupils from now on until
the May examination. Some one
thoughtlessly started the report
that the last two months of the
Normal Department would only
be a preparation for commence-
ment week, and some of our pu-
pils acting on the report in good
faith arranged to go home before
we knew the report had been
started; but we want to say here
and now, that every week, every
day, and every hour of school
time will be spent in the hardest
work of all the year from now
till the close. It is no part of
our intention to slight our stud-
ies for the preparation for Com-
mencement. And we take this
opportunity to say to all who are
thinking of taking the May ex-
amination that here is the place
for you to come if you want the
best preparation that is possible
for long experience to give. We
have made a specialty of this
kind of work for a number of
years, and we feel that we are
as well prepared to aid you as
as any one in this end of the
State.

While our county superintend-
ent, Mr. Barker, was in Frank-
fort last week attending a meet-
ing of the county superintend-
ents of the State, he was inform-
ed by State Superintendent Ham-
mett that the examinations this
year would be harder than they
were last year; so the best thing
for all who are thinking of tak-
ing the examination is to make
each minute count from now un-
til the time comes for the final
test. If you are not a student of
the Normal Department of the
West Liberty High School, now
is a good time to enroll and get
the benefit of the special work
that we are now giving.

On next Saturday there will be
a game of base ball played on the
West Liberty diamond between
Sandy Hook and the school team,
and we want everybody to come
and see the game and enjoy one
good whole afternoon. From
what we hear of the team that is
coming, we think they are all
clean, honest boys and we want
to see how well we can treat
them while they are with us.
They will come from Sandy
Hook in the forenoon and go
back in the afternoon; so we will
have to call the game at one
o'clock for their benefit. They
have asked us to do so, and we
will have the game begin exactly
at one. So don't stay away
thinking it will be about two or
three in the afternoon, as most
games are, but come at one and
see the first game of the home
team this year.

We had teams and men at
work on the athletic field all day
Saturday and got the old ball di-
amond in excellent condition, and
made the little boys a good di-
amond, and also a tennis court for
the girls' benefit. While it is
primarily for the girls, we wish
to have it understood that all
have the same right to play on it
when their "turn" comes, and
no one "set" will be allowed to
monopolize it. Any who buy
their tennis outfits will have the
right to use the court. We did
not get it done, but feel that the
young men who are interested
will finish it with hoes. We used
a disk harrow and a road drag,
and cut it almost level and it will
not take long to finish it now.

All the little boys will now
have a good place to play ball,
for we made them a good di-
amond as we agreed last fall to
do, and we want them to use it
until they are well enough pre-
pared to invite visitors here to
cross bats with them.
Jeffries-Johnson Pictures at K.
We have about finished our

work on the school grounds for
this year, and we leave it in a
much better condition than we
found it. It is cleared of briars
and bushes, planted with 189
trees and has two good ball di-
amonds and a tennis court. We
must see to it now that no cows
find their way into the campus,
and that no people ride into the
grounds. There is no room for
quadrupeds in the school lot this
year.

"Citizen's" Model Superintendent.

There is one office in the gift
of the people that the children
ought to be consulted with about.
This is the office of County Super-
intendent of Common Schools.
Last Sunday night I had a view of
the "home" of one of our county
schools. I went to church in an
adjoining district, and noted the
house in which, for six months
annually, the children must stay
most of the time. It was about
20x30 feet, weatherboarded but
unpainted. On the inside the
walls were bare and of the rough
sawed boards. The teacher and
pupils of the last school had tried
to hide some of the ugliness, for
walls were festooned with with-
ered evergreens. Here and
there were tacked up page illus-
trations from the Police Gazette.
I didn't get much from the ser-
mon. In fact I don't know what
it was about. As I sat there
with closed eyes I could see the
boys and girls cooped up in that
room; could see the love of the
beautiful that is so strong in the
heart of every normal child be-
fore being fought, conquered and killed
by the demons of ugliness that
spring forth from every nook
in the building, and in fancy I
felt the horrible shriveling of the
soul that such environment must
bring. The children are entitled
to better school houses, to beau-
tiful surroundings while at their
study. We fail to realize how
much these things affect the life
and character of the child. On
that afternoon I saw a barn in
that district that was a much
better building than the school
house, and more done to provide
for the comfort of the stock than
for the children.

The Superintendent can do all
that should be done because
of the lack of a sustaining public
sentiment and because the com-
mittee board is, in a measure, de-
pendent upon the fiscal court for
funds, but the "Model Superin-
tendent" would try to build up a
sentiment for these things and
get the people interested in the
school improvement idea.

There would be quite an up-
lift in the public schools if the
Superintendents would practice
a systematic course of weeding
out the teachers who teach for a
few years, just for the money.
Too many boys and girls, who
have no idea of making teaching
a profession, are granted certifi-
cates to teach. Teaching should
be a life profession.

Then the superintendent should
see to it that the morals and hab-
its of the teachers are the best.
But why go on? The race for
Superintendent in this county is
like none of the other races. It
has three candidates, all worth
it, and it is only a question of se-
lecting the most efficient.

CITIZEN.

Husband And wife Die.

On Sunday, at Licking River,
Mrs. Duleena Baker died after an
illness of several months from
something like cancer, and on
Monday her husband, Wm. Bak-
er died. It is said that when
the husband learned that his
wife could not live he said that
he did not want to survive her,
and that his death was the result
of prostration on account of the
death of his wife.

Another Producer.

The Ohio Fuel Co., brought in
a 40 barrel well on the center
farm, a few hundred yards south-
west of the Terrill well, at Canal
City, and the well on the J. T.
Day farm was a fine gas well.
Other wells will be struck shortly.

WILLIS GREEN CARTER.

West Liberty's Oldest Resident,
And Pioneer Physician of
Morgan County Goes
to His Reward.

Dr. W. G. Carter, aged nearly
ninety two years, passed peace-
fully away at his home on pres-
tonburg Street at 7 o'clock p. m.
Saturday. He had been confined
to his bed most of the winter and
his death was not unexpected.

Dr. Carter was one of the pio-
neer physicians of the county, had
practiced medicine for sixty odd
years. He was one of the oldest
masons in the state, having been
made a mason nearly sixty years
ago. He was the last charter
member of Highland Lodge No.
311 at this place. The remains
were interred, under the auspices
of the local lodge, in the fam-
ily plot in the Perry graveyard
near the mouth of Elk Fork Mon-
day. An unusually long proces-
sion of masons accompanied the
remains and took part in the cer-
emonies, and the large crowd of
friends and relatives attested the
esteem in which the venerable
physician was held. He is sur-
vived by four sons. Drs. B. F.
and L. D. and Messrs. J. T. and
J. S. Carter, all of West Liberty.

Will A. Hazelrigg Passes Away

Will A. Hazelrigg, aged about
54 years died at his home at Sal-
yersville at 2:30 p. m. last Thurs-
day of heart failure. He was a
half brother of J. H. Cole and
Mrs. Emma Salyer, of this place;
Mr. Hazelrigg formerly lived here
and worked when a boy and young
man as compositor on the Moun-
tain Scorch, the first newspa-
per ever published in the coun-
ty.

Encourage Boy Corn Growers

The Continental Corporation,
of Pineville, Ky., has notified
Commissioner of Agriculture
Newman that it would make a
standing offer of \$2 per bushel for
the entire yield of the prize-win-
ning acre of corn grown by the
champion boy corn grower in
Kentucky for 1913. The boy en-
titled to sell his corn to the cor-
poration must be a member of
the Boys' Corn Club under the
rules and regulations of the De-
partment of Agriculture co-op-
erating with the Federal Depart-
ment of Agriculture. — Ex.

Prominent Woman Dies

Mrs. Angie Ferguson, wife of
Leander Ferguson, died at her
home near Relief of tuberculosis
Monday. Mrs. Ferguson was a
woman of extraordinary business
ability and her enterprise and in-
dustry were remarkable. She
had a large circle of acquaint-
ances and numbered her friends
by those were fortunate enough
to know her. She is survived by
her husband and three daugh-
ters who have the profound sym-
pathy of a wide circle of friends
and with them the Courier joins
in expressing condolence.

J. Pierpont Morgan Dead.

J. Pierpont Morgan, banker
and financier, of New York City,
died in Rome, Italy, Monday,
March 31. Morgan was the
head of what was possibly the
strongest banking combination
on earth. The Morgan syndi-
cate has financed more gigantic
enterprises than any other group
of capitalists. For some time
a Congressional committee, the
Pujo committee, has been inves-
tigating the dealings of the big
bankers, alleging that they have
formed a "money trust," and it
is said that this investigation
contributed to the illness that
caused the financier's death.
Jeffries-Johnson Pictures at K.
of P. Hall Saturday night.

Local and Personal.

J. S. Henry, of Henry, visited the Courier
office Saturday.

L. L. Cotel, of Forest, was a Saturday
visitor at our office.

Harlan Brown, of Mathew, was visiting
in the city last week.

Dr. S. R. Collier is in Washington D. C.
on business this week.

Judge A. N. Cisco was at Lexington and
Mt. Sterling on business last week.

J. D. Allen, Jr., of Valley, Okla., visited
relatives in West Liberty this week.

T. H. Caskey returned Saturday from
Manfield, Ill. where he had gone on busi-
ness.

W. T. Toliver, representing Morehead
Grocery Co., was here last week calling on
the trade.

Miss Stella Cisco, who is a student of
Hamilton College, Lexington was at home
Saturday morning.

G. W. Salyer, of Grassy Creek, candidate,
for judge, was in to see us Tuesday and left
on order for job work.

Shelley E. Kennaard has moved to
town and occupies the Jan. M. Kennaard
property in college addition.

Miss H. A. Salyer, who is attending the
L. K. Normal school at Richmond, was at
home on a brief vacation recently.

Kelly Ferguson, of Index, who was oper-
ated on at Louisville for fistula's short time
ago has returned home almost well.

Mrs. Emma C. Salyer and Mrs. Jennie
Maunder attended the funeral of Will A.
Hazelrigg at Salyersville last week.

E. P. Wheeler, who has a position as
stenographer for the Morehead Grocery Co.,
visited home folks Saturday and Sunday.

Denny M. Carter and Little son, Marvin
Edman, attended the funeral of Dr. W. G.
Carter and visited relatives in town the first
of the week.

John Patrick, of Grassy Creek, candidate
for As. Sear, called on to see us Saturday
and made arrangements for some advertis-
ing later on.

Lee Ferguson, of Index, was in to see us
Saturday. He told us that he had just
bought a farm in Grassy of Mill Long for
\$3,000.00. This land joins his other tract and
makes him a farm of about 200 acres.

On account of the high water, our line of
Ladies' Misses and Children's hats have
been delayed in transit. As soon as the
trains come to our R. R. Station we will
have them in. A new and up-to-date as-
sessment will be found in our line. Wait
and see them before buying. Call and see
some of our ready to wear and Tailored
hats now on display at our store.

C. W. Womack.

GUMPTION
Which is Common Sense will
out Educational Fair Show.
By L. T. HOWERMALE.

Let's Have A County Fair.
Morgan is the best agricultural
county in the mountains. It has
more tillable acres than any other
mountain county, and its soil
is more fertile. There ought to
be a concerted effort to increase
the quality of the stock in the
county, and to bring the agricul-
tural interests to a higher plane
of endeavor. There are dozens
of kinds of crops, fruits and
grasses that could be profitably
cultivated in this county. There
are opportunities for the promo-
tion of many things in the agri-
cultural line that would put money
in the pockets of the farmers,
and bring more business to the
county.

Poultry raising could be devel-
oped into a very paying propo-
sition in Morgan county. The
reason why eggs and poultry are
cheap here now is because the
farmers depend upon the local
market, which is not large
enough to keep up the prices
that should be had to accord
with the price of meats and
other articles of food. With
several good poultry farms
in the county there would
naturally follow definite ar-
rangements for the shipping
to other markets and the
raisers would get handsome

profits on the output. Eggs
are today quoted in the Lex-
ington market at 20 cents
and here they are only 12
1-2. There ought to be a
good profit in shipping at 7
1-2 cents per dozen. But other
markets offer even bigger oppor-
tunities.

There needs to be something
that will encourage the rais-
ing of more and better cat-
tle, horses, mules, hogs, sheep,
etc., in this county. This year
when the prices of these things
are soaring sky-high the farmers
of this county have none on
hands to sell, having sold off too
close the previous year. By
establishing a County Fair, at
which the farmers could come
annually and compete for the
best farm products would give
a stimulus to the farming indus-
try that would work wonders in a
few years. It would arouse a
pride in the farmers that would
make their efforts doubly profit-
able to them.

The fair should be planned on
very liberal lines; on lines that
would encourage more diversified
farming and the introduction of
new crops, new small fruits and
new and better breeds of the
various kinds of stock. Besides
premiums for the best stock and
the best products of the soil,
there should be liberal premiums
for the farmers who develop the
best methods for improving the
soil and for the successful intro-
duction of new grasses and new

crops of all kinds. Alfalfa would
be a profitable grass if the soil
was inoculated for it, and that
only requires a small amount of
earth from alfalfa land. Vine-
yards would make the rougher
parts of the farms very profitable
instead of worthless, abandoned
lands. There are hundreds of
ways that the farmers of Mor-
gan could increase their profits
if they would grasp the new
ideas, and a county fair would do
more to cause this than any other
agency.

About one mile from town is
an ideal location for a county fair
ground. The land seems to have
been especially designed for it.
A big spot of level land, suitable
for race tracks, is surrounded by
a natural amphitheatre, and only
the minimum expense would be
required to convert it into a com-
plete fair ground. The fair it-
self could be made self-support-
ing if not a good investment. But
the impetus that it would do
to our farming progress is the
chief reason why we should have
it. Talk the matter up, and see
if we can not get the matter un-
der way and have a county fair
this fall.

For Sale or Rent.
Large commodious residence on N. E.
corner of Broadway and Prestonburg streets.
Terms liberal.

Forth question you will find nothing
better than Chamberlain's Liniment. Try
it and see how quickly it gives relief. For
sale by all dealers.

STRAW VOTE

Who is Your Choice for the Various County Offices?

Believing that the COURIER subscription list contains
most of the representative, thoughtful and progres-
sive citizens of Morgan county, and further believing that
the weight of their opinion will have much to do in de-
termining who will be the nominees of the primary of
next August, the COURIER has decided to conduct a
"Straw Election" to obtain the consensus of opinion of
our subscribers as to whom should be nominated.

The COURIER has no choice between the aspirants for
county nominations. It will be absolutely neutral in these
races, treating each with absolute fairness. But in com-
mon with all good citizens it hopes that the best men will
be selected for all the offices.

RULES OF VOTING.

1. The "Straw Election" will be completed July 5, 1913, at which time all the ballots will be counted, and the result published the following week.
2. Any paid-in-advance yearly subscriber, residing in Morgan county, may cast one ballot for each of the offices to be contended for at the next August primary.
3. Only one vote will be allowed to each subscriber for each yearly subscription, and no ballot will be counted unless signed by the subscriber; but the signature will be detached by us before putting in the ballot box, and in no event will the name of the person voting or for whom he voted be divulged. It is strictly a secret ballot.
4. Only subscribers living in Morgan county may vote but the paper may be sent to any person anywhere.
5. Ballots may be sent in at any time, and as soon as a sufficient number have been received the status of the vote will be published and each week thereafter the number of votes cast for each candidate will be published.

Ballot to be used by yearly subscribers already paid.

1913.

Editor COURIER,
West Liberty, Ky.

Being a paid-in-advance yearly subscriber to the Courier I desire to vote in your "Straw Election." I cast my ballot as follows:

For State Senator.....

For Representative.....

For County Judge.....

For County Attorney.....

For County Clerk.....

For School Supt.....

For Sheriff.....

For Jailer.....

For Assessor.....

For Surveyor.....

For Coroner.....

Signed.....

Ballot to be used by new subscribers and renewals.

1913.

Editor COURIER,
West Liberty, Ky.

Find inclosed \$1.00 for subscription (or renewal of sub-
scription) to the Courier for one year, and send the paper to
at....., and I vote for:

For State Senator.....

For Representative.....

For County Judge.....

For County Attorney.....

For County Clerk.....

For School Supt.....

For Sheriff.....

For Jailer.....

For Assessor.....

For Surveyor.....

For Coroner.....

Signed.....

Just write the names of the men you
favor after the name of the office printed
on the above ballot and send it to us.
Address all communications
to
THE COURIER,
West Liberty, Ky.

Morgan county holds its regular meet-
ing the Second Monday in each month.

The Mabley & Carew Co.
(Fountain Square) CINCINNATI, OHIO

WELCOME you to their re-constructed and
improved store. New sales-floors have
been added, New elevators constructed, New
entrances built, walls removed and the entire
interior of the building remodeled.

Thousands of dollars have been expended to make this
store the best of its kind anywhere.

A trip to Cincinnati is not complete unless you include a visit to
Mabley & Carew. We have been busy for many months, reconstructing
improving and bettering, and there is now completed the finest and
store in this part of the country.

We are now ready to say Welcome,
come to this great exposition and see the
largest and most beautiful exclusive
women's and girls' garment floor in Cincin-
nati. An exhibition on the third floor of
handsome Coats, Suits and Dresses for girls,
misses and women, all reasonably priced.

A millinery department occupying the
entire fourth floor in which are displayed more
handsome European and American model hats than
you can see in any other establishment.

The second floor—twenty
thousand square feet devoted
to men's and boys' clothing.

The fifth floor—a great per-
manent exposition of women's
girls' and children's shoes
and women's furnishings.

On the main floor are men's
furnishing, men's hats, men's
shoes, gloves, hosiery, novel-
ties of all kinds.

The basement floor houses
the best house-furnishing and
china departments we
know of.

Again Welcome. Come to Cincinnati, come
to Mabley & Carew, Fountain Square, come right
up from the depot, make yourself at home, use our
big home-like rest room, check your valises and
hand baggage, use our information bureau, write
your letters, all this with our compliments.

We assure you a good courteous
treatment whether you come to
purchase or not, and if you do
purchase we deliver your goods
free by Parcel Post, our delivery
men, come served nice little
lunches at a very small price.

Cincinnati's Great Style
Exposition daily at
The Mabley & Carew Co.
Fountain Square,
Cincinnati, Ohio.

Nervous?

Mrs. Walter Vincent,
of Pleasant Hill, N. C.,
writes: "For three sum-
mers I suffered from
nervousness, dreadful
pains in my back and
sides, and weak sinking
spells. Three bottles of
Cardui, the woman's
tonic, relieved me entire-
ly. I feel like another
person, now."

TAKE

Cardui

The Woman's Tonic

For over 50 years,
Cardui has been helping
to relieve women's un-
necessary pains and
building weak women up
to health and strength.
It will do the same for
you, if given a fair trial.
So, don't wait, but begin
taking Cardui today, for
its use cannot harm you,
and should surely do you
good. E-72

COLLIER'S DENTAL PARLORS
Commercial Bank Building
West Liberty, Ky.

Farmer's Corner.

Angora Goats.

Circular 16 from the Arkansas Experiment Station gives practical facts about Angora goats, from which we take what follows.

In a good type of the modern Angora the back and shoulder should be straight. The shoulders should be of equal height with the hips and the rump should not be too sloping. The chest should be broad, giving the body a round neat appearance. This should be set on four short strong legs. The head is a very important part to examine in selecting good animals. It should be upright and clean cut with a pair of clear, bright eyes and a broad muzzle. The horns of the male are large and gray, with a twist inward, backward and to the outside. The horns of the female are almost straight. In some places they have been bred for the upright ears and in other places the drooping ears have been favored. I know of no particular difference between the two.

Of really greater importance than the shape of the body is the quality of the mohair growing upon it. It is a fact, however, that the best bodies grow the best mohair. The longer the mohair is the greater its value. In selecting for length, however, do not lose sight of the great importance of the quality. This is a mistake that is too often made. The best quality of mohair is very fine, strong and curly and is absolutely white in color. In selecting breeding animals do not select those that have dark or colored spots in their fleeces. This mohair should cover the entire body, except the inner side of the legs. It should be as free of kemp as possible. We will refer to this later on. Mohair should grow to the length of about ten inches in one year on good animals which have the

proper care given them.

It is a pretty well known fact that the Angora goat has long been associated with high, hilly, rough brush-covered land. This is probably due to the fact that browsing over such areas is one of the principal uses or advantages of the animal. The goat likes the leaves and tender branches of trees and bushes in preference to grass. It will eat the things that the other domestic animals refuse. It is not at all particular as to what kind of herbage it eats with a very few exceptions. Often one will see a goat standing on his hind feet reaching for the twigs where there is luxuriant grass under its feet. Its nature is of a browsing rather than a grazing animal. Let us put down as the first use of Angoras the clearing of brush lands. If a flock of goats is turned into a brush covered hill side, it will clear the hill side of the brush and leave it a rich meadow. It is sometimes two or three years before they will kill the brush entirely, but this will eventually happen, because they keep the leaves cropped off and also the tender branches. Without these the roots cannot live long. If the trees are too large for the goats to get to, and if they are to be destroyed, a good plan is that a man should go through a lot and cut the trees down from time to time. Whenever it is possible it is a good plan to cut these trees down in winter and let the goats browse around among the branches. They will find considerable to eat and a great deal of beneficial exercise.

When one is raising goats for their mohair and mutton, and that is the object of Angora raising, it is often well to fence off the pasture land in several lots. These can afford browsing to the flock for several years longer than as if they had all been turned into the large field the first year. This is a part of the management of a flock that it is very necessary for the farmer to

think seriously.

Besides the destroying of underbrush on unbroken areas, another advantage of browsing is evident. The goats will get their entire maintenance on such pasture during the summer season and in some localities where there are live oaks, etc., during a greater part of the winter season. This cost, and that greater profits will be realized from the flock. Some Angora men have made the claim that the fleece grew to a better quality and quantity when the goats were allowed the privilege of the browsing land. It seems to be true that the meat of goats raised in this manner is of a more gamey flavor than the regular pasture fed animals. For those who like "Angora venison" this practice is better.

While the goats are browsing over these lands they are constantly dropping manure of very rich value over it. This enriches the land and brings forth a much larger yield of grass and any other crop that is later put into the field over which the goats have browsed.

Angoras can protect themselves from dogs. The bucks can be trained to be very efficient dog fighters. It may be well to say that the males are called "bucks" and the females "does."—Home and Farm.

Welding two pieces of metal together by the old processes was at best unreliable. When the strain on the welding joint was heavy, you never knew whether it was going to hold, or not. But with the use of electricity in making the weld, the fiber of the two pieces of metal are made to flow into each other and so become practically one piece. The success of this new method was recognized at once, and now you have hardly a tool or piece of machinery on your farm but what is electrically welded where there is a juncture of metals. The present state of perfection of garden and barnyard tools, mowers, reapers, binders, threshers, cultivators, kitchen utensils, dairy machinery, edge tools, chains, automobile engines and steering gears, bottoms of oil cans, frames of bicycles, etc., is made possible through electric welding. The same process produces "Pittsburg Perfect" electrically welded wire fencing, made by the Pittsburg Steel Company, whose advertisements are appearing regularly in this paper. "Pittsburg Perfect" fencing is a solid, one piece fabric with many distinctive advantages, among them being the ease with which it is strung, the great tension to which it can be stretched because of the absolute elimination of "long" and "short" line wires, the surface making wire-cuts impossible, and the neat appearance of the fence. The welded joints in "Pittsburg Perfect" are twice as strong as the wire itself, because two wires are made into one by electricity, which also piles the galvanizing around the joints, adding greatly to the life of the fence. Modern methods of manufacture in many lines have been greatly benefitted by the discovery and practice of welding by electricity.

For the Farmers Wife

OIL OF CEDAR will destroy bed bugs. The will not stay where it is applied, nor will they return when it is once banished.

TO KEEP ANTS FROM SUGAR—Make a heavy chalk mark all around the box in which it is kept, half an inch from it.

FOR COCKROACHES—Sprinkle hellebore where they congregate at night. They will eat it and be poisoned unto death.

WHY HE WAS LATE.

"What made you so late?"
"I met Smithson."
"Well, that is no reason why you should be an hour late getting home to supper."
"I know, but I asked him how he was feeling, and he insisted on telling me about his stomach trouble."
"Did you tell him to take Chamberlain's Tablets?"
"Sure, that is what he needs." Said by all doctors.

We have just received a complete line of Ladies' and Misses' trimmed hats.
Max C. W. Womack.

WRASSY CREEK

The recent flood did considerable damage in this section, but our imitation bridge at Chmepel is standing erect, with both ends off as usual.

I. P. Haney has sold his steam saw and grist mill to J. C. Candiff and Lee Rose. The measles have abated in this section. Jas. W. Davis and Ben F. Nickell passed through our neighborhood last week, testing the political pulse of the voters of Chapel precinct. Also, Jas. M. McClain and Albert Wells passed through shaking hands with the boys, meaning, "vote for me."

Miss Hattie Day is very sick at present. Green Peyton started Saturday for Bradley, Illinois.

It is a little strange that a man is criticized for telling the truth. Nevertheless, it is true. "I noticed," says Citizen, "that Fair Play acted as though something was biting him in his correspondence in the issue of March 13. But I stand by my guns." The same over here; except I have no guns and I guess yours is a pop-gun and loaded with paper wads. I don't know who Citizen is, but he is known; Citizen, there is not a sentence in your article that is biting me. I have no pets. I am independent and vote just as I please. Fair Play's motion is overruled, you say; but without authority. A man may have a practical, yet a limited understanding of the law, as in other things. All teachers have a practical knowledge of the text books, yet there are different grades. None have a thorough knowledge of all the text books. They have the knowledge and simply put it into practice. There is no one in this county that can truthfully say that they have a thorough knowledge of all the text books required to be taught in our common, much less our high schools.

A thorough knowledge means a perfect knowledge. To thoroughly understand a thing means to understand it fully, entirely, completely, etc. (Webster) Which would mean to understand it to perfection. To thoroughly or perfectly understand the law would mean to reach a point beyond advancement. Having gone to perfection we have reached the acme. This is the attainment that Citizen requires of the man that he pretends to want for county judge.

Wonder if he is for either of the candidates now before us for judge? If so, he will be forced to take in his sign, or, as he says, import a man from some other region. I am glad to know that Morgan county is not so hard up for materials as to have to import from elsewhere. Citizen very well knows, as every other intelligent man does, that according to Webster's definition of thorough, there is not a man in Morgan county, no, not in Eastern Kentucky, that is qualified for county judge. Show me a man that claims to fill the specifications that Citizen prescribes and I will show you a bigot. No intelligent man will have the audacity to claim the honor. So, with an ordinary amount of common sense, and Webster to back me, I reiterate my first statement and advise everybody to vote for good, sober, upright men with a practical knowledge of the duties of the office to which they aspire, and the more they know about the duties the better for us. Now Citizen, let's all vote for good men and not fall out over technicalities.

FAIR PLAY.

SPRINGTIME.

"Tis Springtime and the birds sing
From their home up in the trees;
We can always hear the humming
Of the busy bees.

We can see the butterflies
Flying through the air,
They are a sight most beautiful
Than are seen most anywhere.
The rabbits play in the meadows,
The children dance and sing,
The crows caw in the tree tops
And flap their coal-black wings.
But the most beautiful are the flowers
Blooming everywhere,
Making the ground most beautiful,
Putting their fragrance in the air.
O the sights that Springtime bring,
O the lovely sounds we hear,
For Springtime, beautiful Springtime,
Is the best part of the year.

—Kathleen Phipps, age 12.

Famous Address

OF

Col. John T. Hazelrigg

DELIVERED JULY 4, 1776

Many of our older citizens will remember hearing the justly famous Historical Address of the eloquent Colonel Hazelrigg, and because of the historical value of it to Morgan county we have printed and bound it and offer it for sale while they last at 25 cents a copy.

Address
The COURIER,
West Liberty, Ky.

DO YOU WANT INFORMATION ABOUT ANGORA GOATS?

Have you any brush or timber land, the more valuable the better? Angora goats will clean it up and make it grow grass. Good muttons. Fleece double the value of wool. Will thrive where sheep will starve. Dogs do not bother them. Double every year. Mourey mknks.

Geo. E. Allen's 32-page pamphlet, "The Wealth of the Wilderness," tells you all about them—25 cents, postpaid.
Hounce A. Field & Co.,
July 1, Tiago, Ga.

You will look a long while before you find a better medicine for coughs and colds than Chamberlain's Cough Remedy. It not only gives relief—it cures. Try it when you have a cough or cold, and you are certain to be pleased with the prompt cure which it will effect. For sale by all dealers.

Take One Pain Pill, then—Take it Easy.

For Neuralgia, nothing is better than
Dr. Miles' Anti-Pain Pills
Used by thousands for a generation

Those who have suffered from neuralgic pains need not be told how necessary it is to secure relief. The easiest way out of neuralgia is to use Dr. Miles' Anti-Pain Pills. They have relieved sufferers for so many years that they have become a household necessity. I have taken Dr. Miles' Anti-Pain Pills for five years and they are the only thing that does me any good. They have relieved neuralgia in my head in fifteen minutes. I have also taken them for rheumatism, toothache, pains in the breast, toothache, cramps and pains in the bowels and limbs. I have found nothing to equal them and they are all that is claimed for them.
J. W. HESTER, Blue Springs, Mo.
At all drug stores—25 cents; 50 cents; never sold in bulk.
MILES MEDICAL CO., Elkhart, Ind.

Sheriff's Sale.

By virtue of an execution No. 433, which issued from the office of the Clerk of the Morgan Circuit Court on the 25th day of January, 1913, in favor of the Morgan County National Bank, plainiff, against Joe G. Elam, T. M. Elam and Elsie Kilgore, defendants, for the sum of One Hundred and Sixty-five Dollars (\$165.00), and \$21.60 costs, I, one of my deputies, will on

MONDAY, APRIL 14, 1913, (that being the first day of a county court) at 1 o'clock p. m., or thereafter, at the front door of the court house in West Liberty, Ky., offer for sale at public outcry, to the highest and best bidder, the following described tract or parcel of land, or sufficient thereof to satisfy the plaintiff's debt, interest and cost herein.

The land is bounded and described as follows, to-wit:
Lying and being in Morgan county, Ky., on the waters of Spaw's creek, a tributary of Licking River, and bounded on the north by the lands of Oscar Johnson and Scott Johnson, on the south by the lands of Watt Cox, Jas. R. Day and W. P. Elam and on the west by the lands of W. P. Elam and Maude Carter.

Said land will be sold on a credit of six months, purchaser to give bond with good and approved personal security, bearing 6 per cent interest from date and having the force and effect of a replevin bond.

H. B. BROWN, S. M. C.

\$100 REWARD, \$100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials.

\$500

to the woman who sends us the best name for our new Southern Magazine.

Five of the most prominent Women in the States of Kentucky, Tennessee, Alabama, Mississippi, and Georgia, will be the judges.

This magazine will be a woman's magazine in every sense of the word, containing all the best features of the magazine for women including, fiction and up-to-date household departments, and in addition will give expression to the sentiment that woman deserves and should have a better place in the order of civilization than that now accorded her.

It will furnish inspiration to woman and endeavor to show her the way for a better chance in life.

It will strive to show woman the things she can do—the reforms she can institute in woman's work, in business, in schools and the home, in matters of hygiene and health.

It will constantly give practical advice as to how women may earn a living without sacrificing any of the womanly attributes.

CONDITIONS:
Fifty cents for year's subscription must accompany your suggestions for a name. For further particulars and interesting agents' proposition write

Womans Publishing Company
Nashville, Tenn.

NOTE—The publishers of this magazine have for twenty years published one of the best known and most successful trade journals in the South—the "Merchant and the Manufacturer."

"My little son had a very severe cold. I was compelled to try Chamberlain's Cough Remedy, and before a small bottle was finished he was as well as ever," writes Mrs. H. S. S. 29 Bayview street, Sydney, Australia. This remedy is for sale by all dealers.

AT THE Big Store

We have received the biggest stock of goods ever offered to the public in West Liberty.

This means goods of the very latest styles and patterns, of every kind and quality, and should you visit the great department stores of the cities you will not find more up-to-date goods than we have to offer.

We are sole agents for the celebrated

SELBY SHOES

for Ladies, and have a full and complete line now on hand. Our line of Selby Oxfords, of all leathers and kinds, will be in this week, and our prices will be the lowest. Don't take chances—you want the correct footwear—so buy from us.

Our Reputation for handlers of reputable goods in your midst for the past 15 years is your guarantee that you will not be deceived.

Trade with the old reliable merchant of West Liberty and you will make no mistake.

We are the only merchant who visits the markets and brings to you the very latest styles. The goods we offer you can not be purchased by catalogue. They must be seen. The people of West Liberty appreciate this fact.

We want to serve you with the best and will appreciate your trade.

C. W. Womack.

AN "AD" in the COURIER

At the New Store

We have a nice clean stock of

General Merchandise

consisting of most everything to be found in a first-class store. In our stock will be found a nice line of up-to-date SHOES for men, women and children—all sizes, kinds and colors. Our new line of fashionable HATS for ladies is on display and at such low prices no one can pass them by. Remember we have a new line of CALICOES coming in, and at the same old price of 5 Cents per yard. We have all kinds of Underwear for everybody, ask to see what we have. We are always glad to show our goods and make prices to all, because we feel that the quality of goods and the prices will sell them. Our aim has always been to make Quick Sales, and to do so want to Divide Profits with our customers. What about our

Granulated Sugar at 6 1-2c per lb?

We thank the people in and around West Liberty for the nice trade they have given us during the short time we have been in business, and trust that they will see it to their interest to continue the same.

Send your children to our store to trade; they will receive protection and the the same treatment as grown people.

Respectfully yours,

T. B. Sturdivent & Son.
